1. This action is in response to the application that was filed on April 25, 2001.

Claims 1-38 are pending.

2. The following is an examiner's statement of reasons for allowance:

The claimed invention is allowable over the art of record because the art of record does not teach or suggest an apparatus comprising the communicatively coupled combination of elements including a controller, a hybrid switching element for interpreting network data received from a network device and interpreting storage data received from a storage device, a protocol accelerator utilizing a data storage addressing scheme and an error control component that compensates for loss of at least one of a network element and a data storage element and is communicatively coupled to the hybrid switching element, protocol accelerator and controller to enable error control coding including network and data storage as claimed in independent claims 1, 11, 21 and 29.

The claimed invention is allowable over the art of record because the art of record does not teach or suggest a method of acquiring data comprising the combination of interrelated steps including receiving a request for storage data that is available on a first storage device, determining that the storage data on the first storage device is unavailable by a hybrid switching element, the unavailability of the storage data caused by at least one of a network failure and a storage device failure, delineating a path for obtaining the storage data by determining a communication pathway and a redundant data address and

acquiring the storage data based on the delineated path as claimed in independent claim 19.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
